RF Tape and Reel Packaging Application Note
Tape and Reel

INTRODUCTION
This application note applies to RF components that are available to be delivered in Tape & Reel packaging.

1. Features
   • The RF products are packed in cardboard boxes after packaging in anti-electrostatic bags.
   • Cardboard boxes will be used to protect the devices from mechanical shock during transportation.
   • The boxes are not water resistant, and they must be kept away from water and moisture.

2. Description
   This document describes three different packaging types: 3x4, 5x5 and 7x7 sized-products.
